[3] What is Traffic?

ANS.: **Traffic** in marketing refers to the number of people who visit a website, app, or platform.

[4] Things we should see while choosing a domain name for a company.

ANS.:

the things to consider while choosing a domain name:

- It should be simple and easy to remember
- It should be related to your business
- Avoid using numbers and hyphens
- Choose a proper extension like .com or .in

- It should be unique and not similar to others
 - Make sure it is available
 - It should be easy to spell and pronounce
 - Avoid trademark or copyright issues
-

[5] What is the difference between a Landing page and a Home page?

ANS.:

The main difference is their **purpose and focus**:

Landing Page

- Created for a **specific campaign or offer**
- Focuses on **one goal** (e.g., sign-up, download, purchase)
- Has **limited distractions** (few links)
- Used in ads, email marketing, or promotions

Home Page

- Main page of a website
 - Gives **overall information** about the company
 - Contains **multiple links and sections**
 - Helps users explore different parts of the website
-

[6] List out some call-to-actions we use, on an e-commerce website.

ANS.:

some common call-to-actions (CTAs) used on an e-commerce website:

- Add to Cart
- Buy Now
- Shop Now
- View Product
- Add to Wishlist

- Proceed to Checkout
 - Apply Coupon
 - Sign Up / Register
 - Login
 - Subscribe for Offers
 - Track Order
 - Continue Shopping
-

[8] What is the meaning of keywords and what add-ons can we use with them?

ANS.:

Keywords are the words and phrases in your web content that make it possible for people to find your site via search engines

Keywords are the first things you should learn about when you start to optimize your website or blog for SEO.

Add-ons with keywords (for SEO):

- Meta tags (title, description)
 - Headings (H1, H2)
 - URL (keyword in link)
 - Image alt text
 - Content usage
 - Links (internal/external)
 - Schema markup
 - Social tags (OG tags)
-

[9] Please write some of the major algorithm updates and their effect on Google rankings.

ANS.:

In SEO, algorithms are complex rules and formulas that search engines like Google use to rank websites. These algorithms analyze factors like keywords, backlinks, content quality, and user experience to decide which pages should appear at the top of search results. • Algorithm updates are changes made by search engines to improve search quality, fight spam, and provide better results to users. Google frequently updates its algorithms to ensure that high-quality, relevant content ranks higher.

Algorithm updates in SEO:

1. Panda Date: February 24, 2011 Hazards: Duplicate, plagiarized or thin content; user-generated spam; keyword stuffing.
 2. Penguin Date: April 24, 2012 Hazards: Spammy or irrelevant links; links with over-optimized anchor text.
 3. Hummingbird Date: August 22, 2013 Hazards: Keyword stuffing; low-quality content.
 4. Mobile Date: April 21, 2015 Hazards: Lack of a mobile version of the page; poor mobile usability.
 5. RankBrain Date: October 26, 2015 Hazards: Lack of query-specific relevance; shallow content; poor UX.
 6. Medic Date: May 4, 2018 Hazards: Lack of authority on YMYL websites; weak E-A-T signals.
 7. Bert Date: October 22, 2019 Hazards: Poorly written content; lack of focus; lack of context.
 8. Core Updates Date: 2017-present
-

[10] What is the Crawling and Indexing process and who performs it?

ANS.:

Crawling:

Crawling is the process in which search engines scan and discover web pages on the internet by following links from one page to another. This process helps search engines find new and updated content. It is performed by automated bots such as Googlebot.

Indexing:

Indexing is the process of storing and organizing the collected web pages in the search engine's database. After indexing, these pages become eligible to appear in search results on Google Search.

Who performs it?

Both crawling and indexing are performed automatically by search engine bots or spiders.

Conclusion:

Crawling helps discover content, while indexing stores it, making it available for ranking in search results.

[11] Difference between Organic and Inorganic results.

ANS.:

Difference Between Organic and Inorganic Results:

Feature	Organic Results	Inorganic Results (Paid Ads)
Meaning	Free search results based on SEO	Paid results (advertisements)
Cost	No direct cost	Pay per click (PPC)
Placement	Appear below ads in search	Appear at top/bottom of Google Search
Trust	More trusted by users	Less trusted (marked as "Ad")
Traffic	Long-term traffic	Instant but temporary traffic
Example	Blog, website pages	Google Ads, sponsored links

[12] Create a blog for the latest SEO trends in the market using any blogging site.

ANS.:
